

# INSTITUTIONAL ETHICAL CLEARANCE COMMITTEE

## SRI SIDDHARTHA DENTAL COLLEGE, TUMKUR

Minutes of meeting held on 29/03/2019

Dr. Sowmya presented her research topic titled "Comparative evaluation of 0.1% Octenidine mouthwash with 0.2% Chlorhexidine mouthwash in prevention of plaque and gingivitis – A clinicomicrobiological pilot study" in front of the committee members.

Dr. Manjunath mentioned the investigator to correct the values mentioned in the review of literature to substantiate the need for the study & to combine the objectives. Dr. K R Kashinath corrected the objectives to stress upon prevention. Dr. Naveen raised ethical issues related to staining property of Chlorhexidine & that was resolved by the investigator & co – investigator Dr. Sanjay venugopal. Dr. Mythri mentioned to include the control group evaluation in the objectives which was missing in the study.

As it was a pilot study, Dr. Manjunath said the research can be done with few corrections.

Finally, the study was accepted by the members present on the day for ethical clearance.
