Subject; Report of international Exchange Programme to Okayama, Japan

Respected sir

Addressing to the above subject I had been selected to international exchange programme for the year 2018 to Okayama University Japan, through IPS. Sir it was a lifetime experience for me going to japan through IPS. Sir I had gone for four weeks from 24th September to 22nd October 2018 to Okayama university of Japan under professor Takuo Kuboki .

Sir after reaching the university i have been given the task of finding something new in bone regeneration in Periodonitis by Kuboki sir and gave presentation of the same before completing my visit.

Sir also I was allowed to observe their clinical department proceedings under various staff on each day in a week. I noticed mainly their sterilization protocol with high standards and also maintaining an systemic approach for each case especially the placement of implants. One more thing of appreciation is maintain the time by each staff. I was allowed for the seminar presentation of PHD students in the department on every Tuesday at 5.30pm evening.

Sir during my stay I presented two presentation of which first is my **COLLEGE PRESENTATION** and second is my research related to bone formation i.e. **SIGNIFICANCE EXTRA CELLULAR MATRIX & MATRIX METTALOPROTEINASE ENZYME ON BONE FORMATION.**

Sir finally before my last visit I have been given certificate by Kuboki sir related to my presentation in my send off party.

Sir I will be attaching some photos related to my stay in Okayama University and Certificate along with this letter

Sir finally Thank you once again for giving an opportunity to visit Japan.

Thanking you

**Yours faithfully
Shylesh kumar B.S.**
